SPECIAL QUOTATIONS

SOY BEANS!

Recommended Varieties:

OIL BEANS —

1. **WABASH** — CERTIFIED — The newest and probably the best oil bean on the market for the area of Kansas, Missouri, and Southern half of Illinois and Indiana. Excellent bean for combining — very little loss. Same maturity as Chief — about 9 days later than Lincoln. Should replace most varieties except Chief on thin land and Lincoln for early maturity.
2. **CHIEF** — Adapted to same latitude as Wabash and is a better bean than Wabash on thin soils only.
3. **LINCOLN** — Outstanding, early maturing soy bean — very high yielding — very high in oil content.

HAY BEANS —

1. **VIRGINIA** — BROWN BEANS — in very short supply — order early.
2. **BLACK WILSONS** — very good hay bean — order early if you need these.
3. **COWPEAS** — mixed — in very short supply.

LATE SEASON

Unusually cold weather over the greater part of the United States has retarded farm activities. The planting season in many areas is from two to four weeks behind schedule.

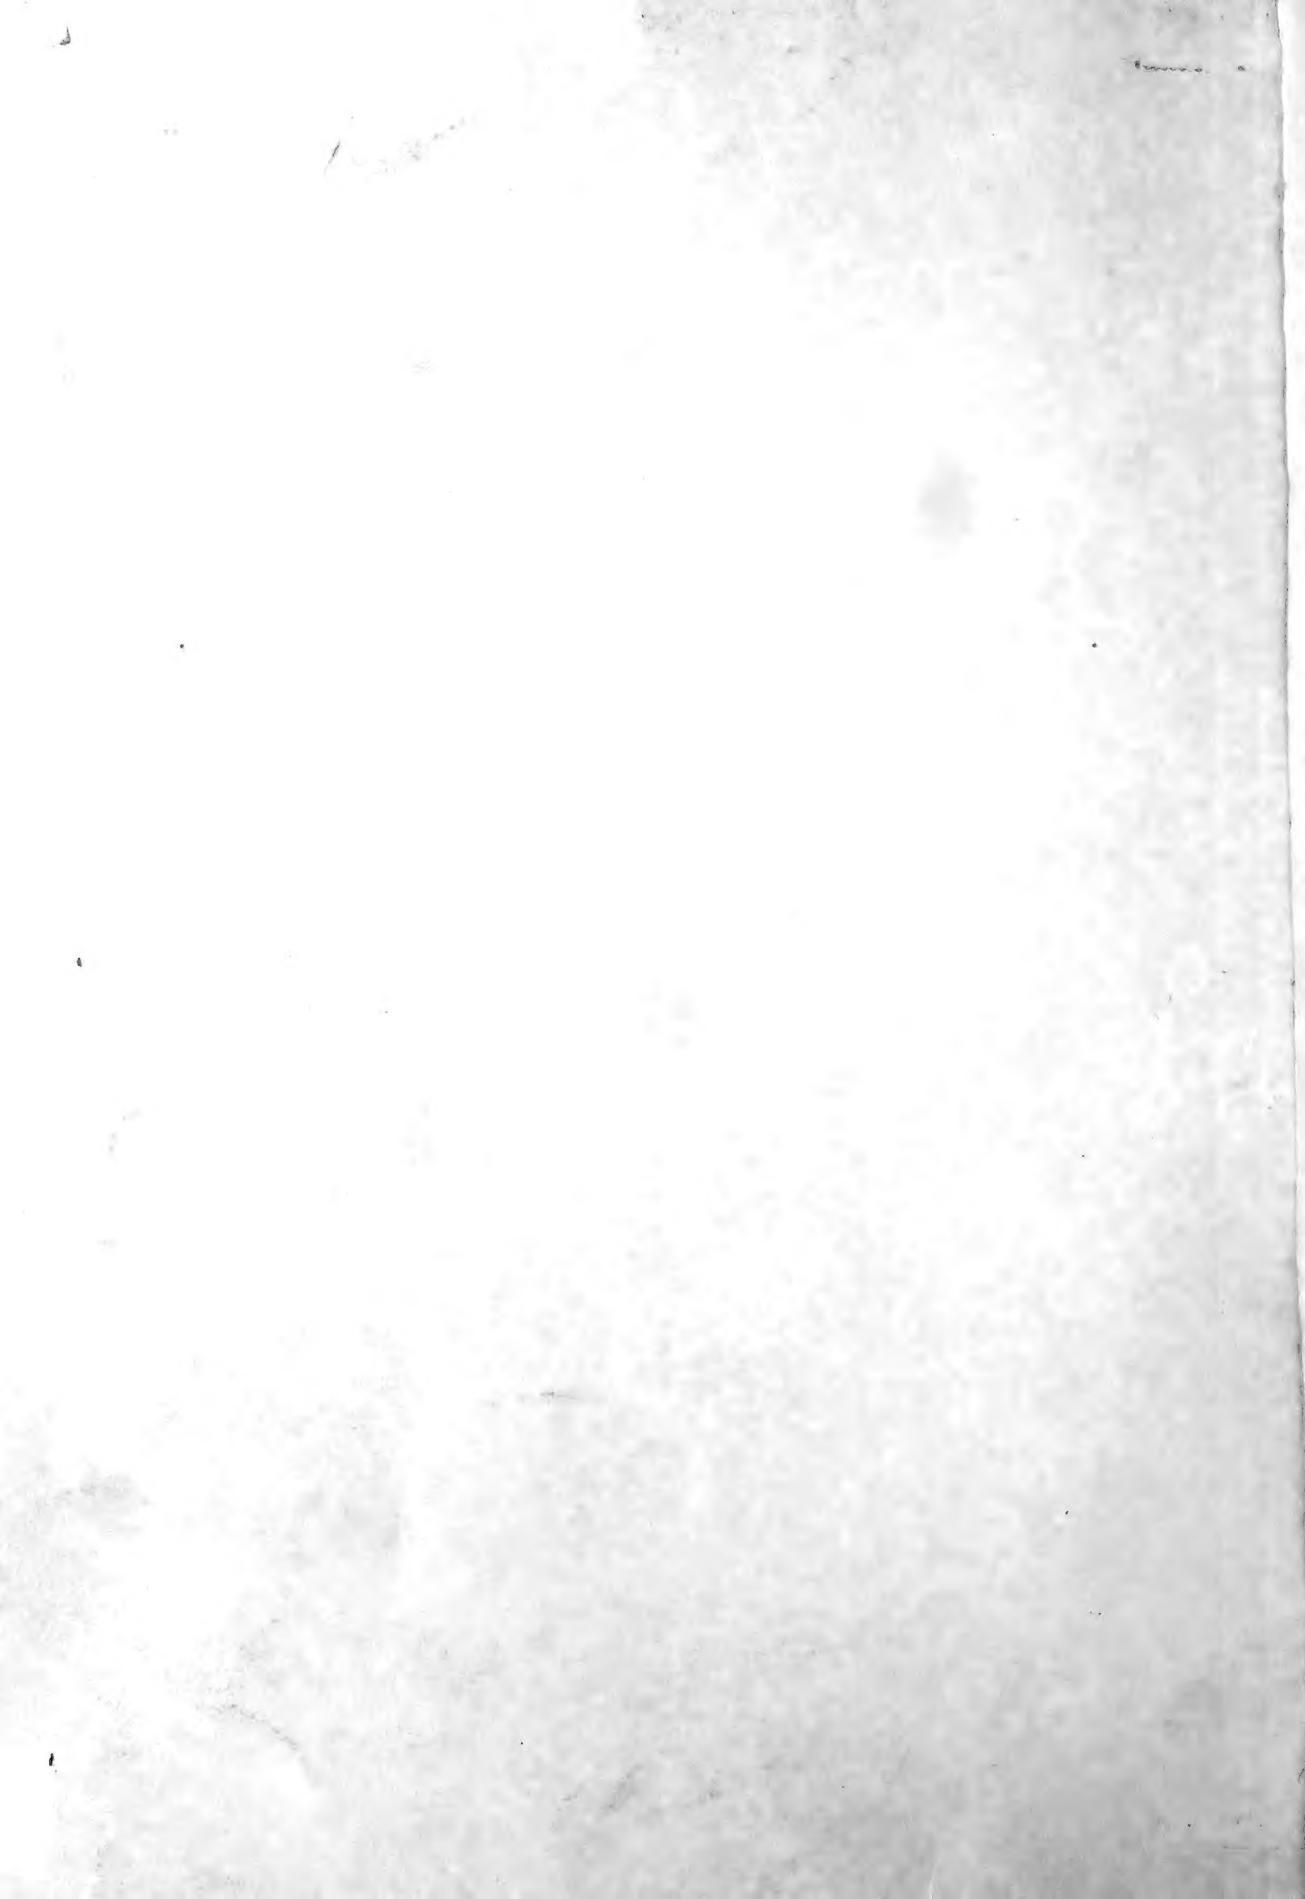

More business is to be expected for many grasses and legumes. We have limited stocks of most of the leading varieties and are prepared to make immediate shipment.

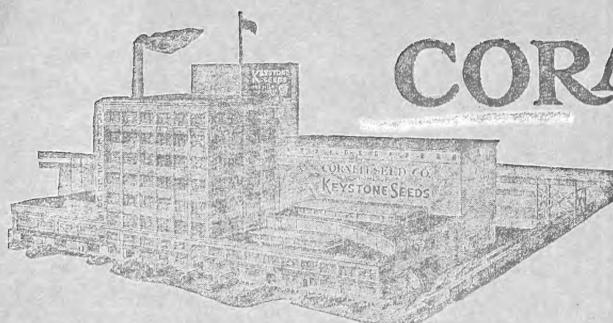

SEED CORN!

Recommended Varieties:

1. **KEYSTONE 38** — Outstanding Hybrid for upland and bottomland soils — shows tolerance to corn borer attack — has enviable record in official state yield trials in Missouri, Illinois, Oklahoma, Arkansas and Colorado.
2. **KEYSTONE 39** — Medium Early, High-yielding, excellent feeding corn — plant on rich, fertile soils where other varieties grow too tall.
3. **KEYSTONE 40** — Excellent Hybrid for upland and sandy soils — in very short supply.
4. **KEYSTONE 44** — 90-100 Day Hybrid — excellent for late planting — makes more corn and bigger ears than any 90 Day Hybrid we have ever seen.
5. **KEYSTONE 106W** — Excellent White Hybrid — very high yielding — good milling corn.
6. Also, U. S. 13, Mo. 8, Mo. 148, Mo. 313, Ill. 200, Ky. 103, U. S. 35.
